Response to Amendment

The examiner is in receipt of applicant's response to office action mailed 12/29/2005, which was received 1/6/2006. Acknowledgement is made to the cancellation of claims 1-16 and the addition of claims 17-37. The amendment has been carefully considered and is found to require a restriction, which follow:

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-27, drawn to a system for controlling brand image including a third subsystem for remotely programming the promotional display, classified in class 705, subclass 27.
- II. Claims 27-37, drawn to a system for controlling brand image, classified in class 705, subclass 27.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as a third subsystem for remotely programming the promotional display. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species:

Group IA – 17,18,19,20,23

Group IB – 17,18,19,20,24

Group IC – 17,18,19,20,25

Group ID – 17,21

Group IE – 17,22

Group IF – 17,26

Group IIA – 27,28,29,30,34

Group IIB – 27,28,29,30,35

Group IIB – 27,28,29,30,36

Group IID – 27,32

Group IIE – 27,33

Group IIF – 27,37

The species are independent or distinct because they contain obvious divergent subject matter such as messages, tags, a physical kiosk, etc.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 17 and 27 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
